The Modern Language Association Language Map (www.mla.org/census--main) uses census data to create interactive maps showing the distribution of foreign-language speakers in the United States (warning: It may be a long download). The Letters game (hannu.daug.net/letters/index.php) starts slowly, but don't be fooled. Soon you'll be typing madly. The ungainly address www.lewisandclarkandwhatelse.com leads to a site offering a daily look at what was going on elsewhere while the explorers roamed the West.
